FOR IMMEDIATE RELEASE:

Ameranth's-Visionary/New-'AI-Based' Inventions/Patents Position it as the Hospitality Market 'AI Orchestration' Leader For 2025+

'Newest Patents Will Significantly Expand And Extend Ameranth's Vast AI Patent Portfolio'

January 15, 2025, San Diego, CA — Ameranth, Inc. announced today the synchronization of its 'AI-Based' IP Portfolio into a multi-generation AI suite for 2025+ as:

AMERANTH™ AI
INTELLIGENCE

Since 2005, Ameranth has pioneered machine intelligence, and intelligent systems and deployed them into thousands of locations with several of the world's largest hospitality companies - while licensing its patents to dozens of the largest restaurant, hotel and event ticketing companies in the world. It's '130, '415 and '587 patents represent its 1st generation of intelligent systems. Since 2023, its newest 'AI Based' patent family represents its 'third generation' intelligent systems/inventions and the recent allowance of its third 'AI based' patent along with the expected imminent allowance of yet another patent - its 2nd generation patent i.e. its 'Improved , Intelligent and Integrated (I³) System', enables Ameranth to unite this Patent/IP suite together, linking the past/present/future of its AI Innovations/Leadership while positioning Ameranth to be the Hospitality AI "**Orchestration Framework**' Leader, with AI system/network '**Orchestration**'- now the critical link between turning AI Concepts into Real Solutions. [Why 2025 will be the year of AI orchestration | VentureBeat](#)

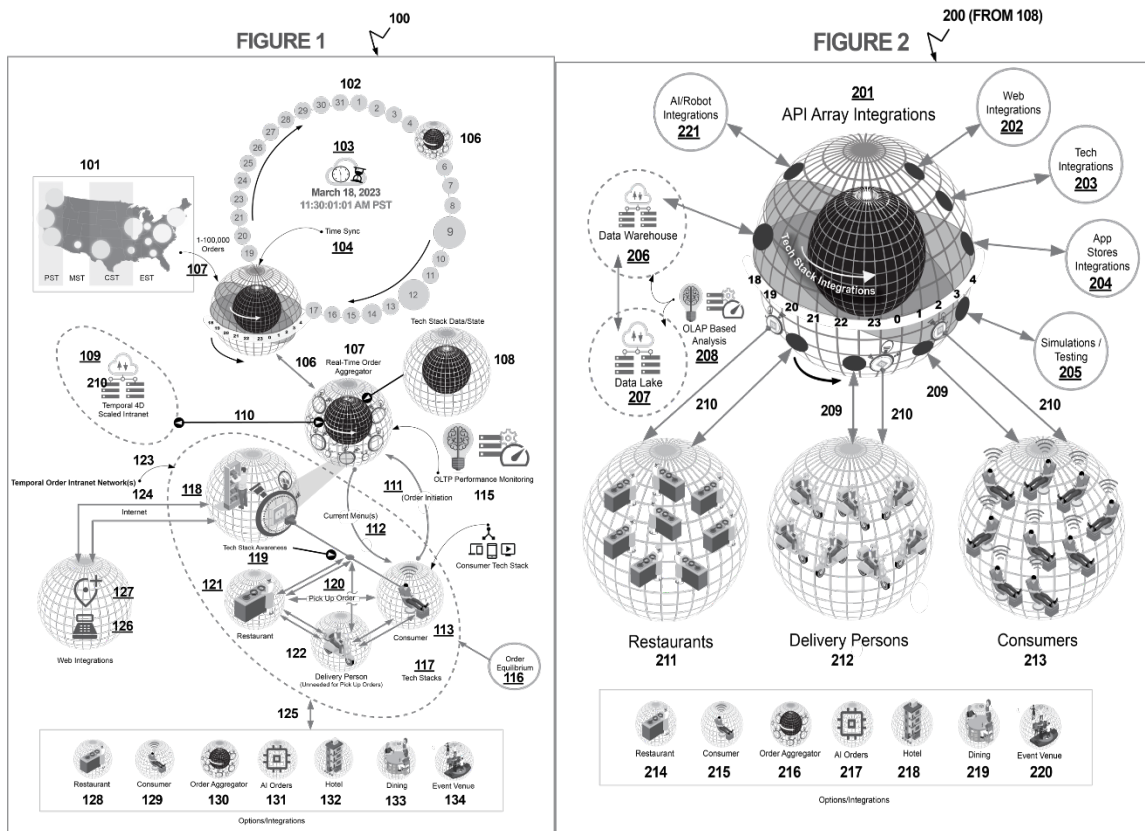

Ameranth's newest patent allowance for its '*Adaptable Computing Network With Real Time, Intelligent, 4D Spherical Scalability, Tech Stack Awareness, Tech Stack Integration, Automatic Bi Directional Communications Channel Switching And Order Equilibrium - For Large Enterprise, Time Sensitive Event/Transaction Driven Applications*' was recently granted and the new patent is expected to issue on or about March 1, 2025 -as the third of Ameranth's new 'AI based' patent family, and with the fourth new AI Based patent to follow and expected to issue in Q-4, 2025.

This newest AI Based patent will include 30 additional claims, bringing Ameranth's total claims in its new AI based family to nine independent claims and 70 dependent claims, for a total of **79** individual inventive claims. represent Ameranth's newest as it has just been allowed this new 'AI Based'. It includes 30 new claims (conceived by Ameranth's Founder/President and lead inventor,

Keith McNally) - which are initially claimed with respect to 4 Hospitality Market Embodiments, of (1) food/drink ordering, (2) restaurant reservations, (3) hotel/rental reservations, and (4) event ticketing; (but also includes poker/gaming solutions too) and its scope is far broader than these initial embodiments. Figures 1 and 2 below provides a general visualization of some of its new revelatory inventive concepts/integrations and unique/'non conventional' ordered combinations. That these new technological advancements and innovations are visionary and entirely new was/is confirmed by the USPTO Examiner in the 'Notice of Allowance' reasons.

Included in these newest 30 'AI based' claims are new inventive concepts, uniquely conceived by Ameranth and which are truly visionary, e.g. inclusive of AI deployments/integrations, on/with the latest mobile smart phones, and integrations with the widespread deployments of API's in the hospitality market, along with many other critical and cutting edge integrations.

In 2025 - Ameranth's is focused on continuing to innovate/lead and the monetization and licensing of its expansive/visionary, 'AI Based' IP while building value for its shareholders.

About Ameranth, Inc.: The adoption and widespread licensing of Ameranth's technology by many industry leaders/chains and the wide acclaim received by Ameranth for its technological innovations are just some of the many confirmations of the breakthrough aspects of Ameranth's inventions. Ameranth has also received twelve different technology awards (three with "end customer" partners) and it has been widely recognized as a hospitality wireless/internet/AI technology leader.
